Combined Exercise

Worksheet 2. Track C, 14:00 to 34:00. One continuous exercise. Draft only. Stop before sending.

Name: _____ Table: _____

Part 1: Prompt it (5 min)

Pick a real email you need on Monday, sanitized, or: a tricky email, meeting notes summary, meeting prep, a short proposal.

My prompt (four parts plus "good looks like" line):

Part 2: Get your briefing, then draft the top one (5 min)

Ask Muse to look at your 3 most recent emails in your own inbox and give you a briefing for each one: what do I need to know, when do I need to know it, and what do I need to do next? If you did not connect your inbox, use the Jordan Lee demo or the 3 sample emails on the board. If Muse is not logged in, use any free chat app.

My briefing (one line per email: Know / When / Next):

Now draft the most urgent one. Draft only. Stop before sending.

My draft (or the key lines of it):

Part 3: Evaluate it: blind judge (5 min)

Swap with your partner; they make one change. Hold your own phone and show both drafts, marked only "left" and "right," to a judge from the next pair. The judge views them on your phone, then scores on this sheet. Your phone stays in your hands.

Judge picked: ☐ Left ☐ Right ☐ Could not tell

Why, in one line (check for slop: generic, invented, too long, or delete it):

The one change that would make the losing version win:

Read the winning draft out loud to your table. One thing our table learned:

_____

Combined Exercise (back)

Part 4: Turn it into an agent (5 min)

Design the agent for the same chore. Email first: summarize your emails, then draft / reply to 1 email.

Trigger: what starts it?	**AI step: what it does**
Human approval: you check it	**Destination: where it goes**

Value: saves me _____ / week. Implication: _____

Fast-finisher stretch: no second exercise

Add one constraint. Example: “It must never send without me.”

My constraint: _____
